

DeepFake Detection Report

Prediction: FAKE
Confidence Score: 84.91%
Risk Level: HIGH RISK

Multimodal Analysis

Video Confidence: 80.56%
Audio Confidence: 95.05%
Manipulation Score: 84.91%

Grad-CAM Visualization

Analysis Summary

This media file was analyzed using a multimodal deepfake detection framework. The system evaluates both visual and audio characteristics and combines the results to estimate the likelihood of manipulation.

Models Used

- ResNet18 + Attention Mechanism (Video Analysis)
- MFCC Feature Extraction (Audio Analysis)

- Multimodal Fusion Strategy
- Grad-CAM Explainable AI Visualization
